MURAL TEMPLATE

Systematically optimize and design better processes

Business Process Modeling Diagram

INTRODUCTION

To improve a process, it's important to first reflect on exactly what that process entails. Use our business process model diagram (BPMN) template to map out your business steps in a flowchart format.

Visualizing actions from start to finish enables you and your team to model your way of work and optimize it. By reviewing what is and isn't working, you may surprise yourselves in discovering competitive advantages. Ready, set, flow!

Participants

Time
1 - 3 hours

Difficulty
Beginner

TOOL TIPS

Create connections at the speed of thought:

Hold C + click and drag to **draw a connector.**

Turn on **connector points** to create new diagrams faster.

Click on the **connector points** to instantly add new connectors and shapes.

Change **connector styles.**

Switch between different shapes and sticky notes quickly.

Bulk edit objects of the same type by filtering your selection from the toolbar.

Extra: Add swimlanes and expand canvas (video)

Add labels to connectors double click on the line or choose the "+T" symbol from the connector's toolbar, then type your text.

RESOURCES

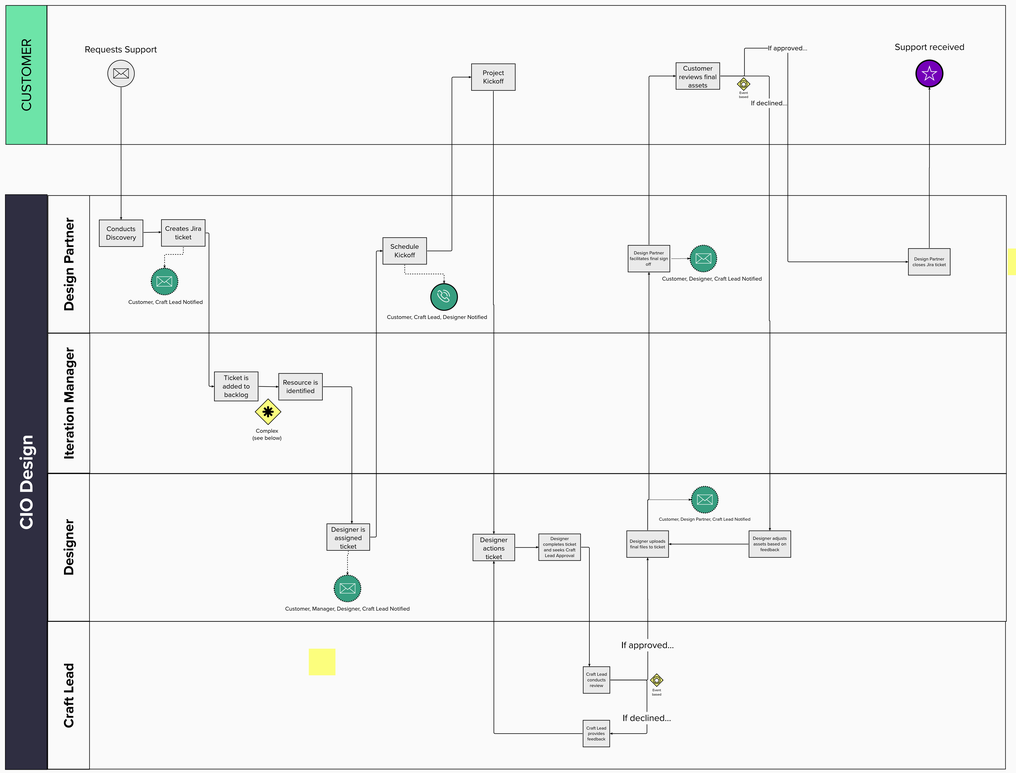
1 Pre-session

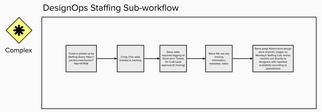
Decide on the process you want to map.

Process: Short-term Design Support

2 Mapping

Gather with the team and from left to right map your agreed process from start point to end point.





BPMN References

For the sake of simplicity not all the BPMN references were included.

Events

Start, Intermediate, End

Gateway

Exclusive, Event based, Parallel, Inclusive, Complex

Activity

Task, Transaction

Flow

Sequence, Message, Association

Pool and swim lane

Pool, Swim lane, Swim lane

Artifact

Data, Group, Anotation

Tip!

You can use symbols for visual aid inside BPMN elements

Message, Success, Call, Issue

Work area

3 Assessment

Review the process.
- What is working?
- What is not working?
- What needs to work in order to *optimize* practice?

Copy/paste (or duplicate holding alt + drag and drop) to complete this task.

Efficient, Inefficient, Unknown task

4 Thinkering

Model the process.
- What changes need to be made?
- Who should be involved in those changes?

5 Planning

Next steps.
- Action plan for moving forward.

Next steps ideas

Moving forward!
